Vulnerable employment for females has improved in Australia since 1991

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 8.2% and among men is 12.3% in Australia for 2022. The rate of vulnerable employment is lower for men and women in Australia compared to the average rate in East Asia & Pacific.
