123 women die per 100,000 live births due to pregnancy-related causes in Bangladesh

The maternal mortality ratio in Bangladesh has improved from 441 in 2000 to 123 in 2020. Maternal mortality in Bangladesh is lower than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

76 of every 1,000 girls ages 15-19 gave birth in Bangladesh in 2020

In Bangladesh, the rate of adolescent fertility has decreased since 2010. The rate in 2020 was higher than the average rate in its income group.

74.3% of girls and 59.7% of boys complete lower secondary school in Bangladesh as of 2017 data

The gap in lower secondary completion rate between boys and girls, 14.7, is larger than the gap of the South Asia aggregate, 2.8. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Adult literacy in Bangladesh is lower among women than among men (2020)

The adult female literacy rate in Bangladesh is higher than in South Asia. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

In Bangladesh, the labor force participation rate among females is 37.7% and among males is 80.6% for 2022.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has increased. Compared with labor force participation in the lower-middle income group, the gap between men and women is higher in Bangladesh.

Vulnerable employment for females has improved in Bangladesh since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 64.3% and among men is 49.2% in Bangladesh for 2021. The rate of vulnerable employment is lower for men and women in Bangladesh compared to the average rate in South Asia.
