### 45 of every 1,000 girls ages 15-19 gave birth in Cambodia in 2021

In Cambodia, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2021 was nearly the same as the average rate in its income group.

### Adolescent fertility rate (births per 1,000 women ages 15-19)

Source: United Nations Population Division, World Population Prospects.

### 67.5% of girls and 57.1% of boys complete lower secondary school in Cambodia as of 2022 data

The gap in lower secondary completion rate between boys and girls, 10.4, is larger than the gap of the East Asia & Pacific aggregate, 3.6. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

### Lower secondary completion rate, by sex (% of relevant age group)

### Adult literacy in Cambodia is lower among women than among men (2022)

The adult female literacy rate in Cambodia is lower than in East Asia & Pacific. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

### Adult literacy rate, by sex (% of people ages 15 and above)

**Vulnerable employment for females has improved in Cambodia since 1991**

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 60.4% and among men is 44.9% in Cambodia for 2022. The rate of vulnerable employment is higher for men and women in Cambodia compared to the average rate in East Asia & Pacific.

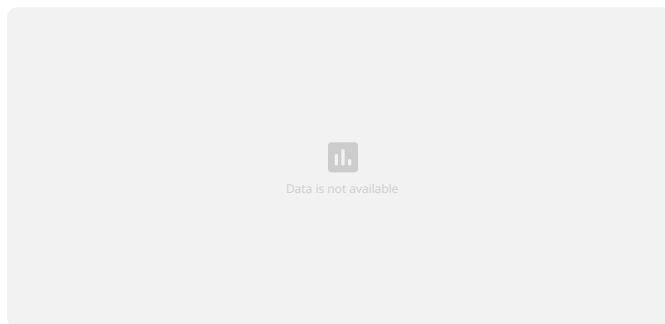

**Vulnerable employment, by sex (% of total employment) (modeled ILO estimate)**

— Female — Male

## 41.4% of men and 48.9% of women owned a dwelling either alone or jointly in 2022

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women's empowerment, nutritional and health outcomes, and children's schooling.

### House ownership status, by sex (% of population age 15-49)

#### Male

58.6% do not own a house  
3.2% own a house alone  
37.9% own a house jointly  
0.3% own a house both alone and jointly

#### Female

51.1% do not own a house  
7.7% own a house alone  
40.9% own a house jointly  
0.3% own a house both alone and jointly
