212 women die per 100,000 live births due to pregnancy-related causes in Equatorial Guinea

The maternal mortality ratio in Equatorial Guinea has improved from 427 in 2000 to 212 in 2020. Maternal mortality in Equatorial Guinea is lower than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

Adolescent fertility rate (births per 1,000 women ages 15-19)

144 of every 1,000 girls ages 15-19 gave birth in Equatorial Guinea in 2020

In Equatorial Guinea, the rate of adolescent fertility has decreased since 2010. The rate in 2020 was higher than the average rate in its income group.

Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Adult literacy in Equatorial Guinea is lower among women than among men (2010)

In Equatorial Guinea, both women and men have very high literacy rates. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Lower secondary completion rate, by sex (% of relevant age group)

23.7% of girls and 24.7% of boys complete lower secondary school in Equatorial Guinea as of 2015 data

The female rate in Equatorial Guinea is lower than both Sub-Saharan Africa and the upper-middle income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

23.7% of girls and 24.7% of boys complete lower secondary school in Equatorial Guinea as of 2015 data

The female rate in Equatorial Guinea is lower than both Sub-Saharan Africa and the upper-middle income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

23.7% of girls and 24.7% of boys complete lower secondary school in Equatorial Guinea as of 2015 data

The female rate in Equatorial Guinea is lower than both Sub-Saharan Africa and the upper-middle income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

In Equatorial Guinea, the labor force participation rate among females is 51% and among males is 58.4% for 2022.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has remained roughly the same. Compared with labor force participation in the upper-middle income group, the gap between men and women is lower in Equatorial Guinea.

Vulnerable employment for females has improved in Equatorial Guinea since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 88.1% and among men is 74% in Equatorial Guinea for 2021. The rate of vulnerable employment is higher for men and women in Equatorial Guinea compared to the average rate in Sub-Saharan Africa.
