263 women die per 100,000 live births due to pregnancy-related causes in Ghana

The maternal mortality ratio in Ghana has improved from 499 in 2000 to 263 in 2020. Maternal mortality in Ghana is lower than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

Maternal mortality ratio (deaths per 100,000 live births)

65 of every 1,000 girls ages 15-19 gave birth in Ghana in 2020

In Ghana, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2020 was higher than the average rate in its income group.

Adolescent fertility rate (births per 1,000 women ages 15-19)

78.5% of girls and 77.9% of boys complete lower secondary school in Ghana as of 2019 data

The female rate in Ghana is higher than Sub-Saharan Africa but nearly the same as the lower-middle income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

Adult literacy in Ghana is lower among women than among men (2020)

The adult female literacy rate in Ghana is higher than in Sub-Saharan Africa. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Adult literacy rate, by sex (% of people ages 15 and above)

In Ghana, the labor force participation rate among females is 65.3% and among males is 72.4% for 2022.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with labor force participation in the lower-middle income group, the gap between men and women is lower in Ghana.

Vulnerable employment for females has improved in Ghana since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 78.2% and among men is 62.5% in Ghana for 2021. The rate of vulnerable employment is lower for men and women in Ghana compared to the average rate in Sub-Saharan Africa.
Data is not available for Ghana for Proportion of time spent on unpaid domestic and care work, by sex (% of 24 hour day).

27% of men and 18.9% of women owned a dwelling either alone or jointly in 2014

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women's empowerment, nutritional and health outcomes, and children's schooling.
