43.5% of men and 35.3% of women owned a dwelling either alone or jointly in 2012

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women's empowerment, nutritional and health outcomes, and children's schooling.

House ownership status, by sex (% of population age 15-49)

Male

56.5% do not own a house
29.1% own a house alone
12.6% own a house jointly
1.8% own a house both alone and jointly

Female

64.7% do not own a house
12.8% own a house alone
21.4% own a house jointly
1.1% own a house both alone and jointly
