78 women die per 100,000 live births due to pregnancy-related causes in Nicaragua

The maternal mortality ratio in Nicaragua has improved from 169 in 2000 to 78 in 2020. Maternal mortality in Nicaragua is nearly the same as its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

87 of every 1,000 girls ages 15-19 gave birth in Nicaragua in 2020

In Nicaragua, the rate of adolescent fertility has decreased since 2010. The rate in 2020 was higher than the average rate in its income group.

73.1% of girls and 60.1% of boys complete lower secondary school in Nicaragua as of 2010 data

The gap in lower secondary completion rate between boys and girls, 13, is larger than the gap of the Latin America & Caribbean aggregate, 5.1. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Adult literacy in Nicaragua is nearly the same among women and men (2015)

The adult female literacy rate in Nicaragua is lower than in Latin America & Caribbean. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

In Nicaragua, the labor force participation rate among females is 49.4% and among males is 83.6% for 2022.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has increased. Compared with labor force participation in the lower-middle income group, the gap between men and women is lower in Nicaragua.

Vulnerable employment among women has remained nearly the same since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 45.3% and among men is 33.1% in Nicaragua for 2021. The rate of vulnerable employment is similar for men but higher for women in Nicaragua compared to the average rate in Latin America & Caribbean.
