124 women die per 100,000 live births due to pregnancy-related causes in Vietnam

The maternal mortality ratio in Vietnam has worsened from 97 in 2000 to 124 in 2020. Maternal mortality in Vietnam is higher than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

35 of every 1,000 girls ages 15-19 gave birth in Vietnam in 2020

In Vietnam, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2020 was lower than the average rate in its income group.

100.7% of girls and 94.8% of boys complete lower secondary school in Vietnam as of 2018 data

Girls and boys in Vietnam have a very high completion rate of lower secondary school. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Adult literacy in Vietnam is lower among women than among men (2019)

In Vietnam, both women and men have very high literacy rates. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

In Vietnam, the labor force participation rate among females is 69.1% and among males is 78% for 2022.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with labor force participation in the lower-middle income group, the gap between men and women is lower in Vietnam.

Vulnerable employment for females has improved in Vietnam since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 57% and among men is 46.9% in Vietnam for 2021. The rate of vulnerable employment is higher for men and women in Vietnam compared to the average rate in East Asia & Pacific.
