In Virgin Islands (U.S.), the labor force participation rate among females is 45.1% and among males is 66.2% for 2023

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with labor force participation in the high-income group, the gap between men and women is higher in Virgin Islands (U.S.).

Labor force participation rate, by sex (% of population ages 15+) (modeled ILO estimate) ● Female ● Male

Vulnerable employment among women has remained nearly the same since 1991

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 5% and among men is 8.6% in Virgin Islands (U.S.) for 2022. The rate of vulnerable employment is lower for men and women in Virgin Islands (U.S.) compared to the average rate in Latin America & Caribbean.
