536 women die per 100,000 live births due to pregnancy-related causes in Sub-Saharan Africa

The maternal mortality ratio in Sub-Saharan Africa has improved from 802 in 2000 to 536 in 2020. Maternal mortality in Sub-Saharan Africa is higher than the world average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

Maternal mortality ratio (deaths per 100,000 live births)

102 of every 1,000 girls ages 15-19 gave birth in Sub-Saharan Africa in 2020

In Sub-Saharan Africa, the rate of adolescent fertility has decreased since 2010. The rate in 2020 is higher than the world average.

Adolescent fertility rate (births per 1,000 women ages 15-19)

43% of girls and 46.1% of boys complete lower secondary school in Sub-Saharan Africa as of 2020 data

While the trend across countries and regions shows more girls completing secondary school than boys, Sub-Saharan Africa is the only region in which the regional rate is higher for boys than for girls. It is also the only region, in which the lower secondary school completion rates are lower at the regional level than the global level. (girls: 78, boys: 77). Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

**Adult literacy in Sub-Saharan Africa is lower among women than among men (2020)**

The gap in adult literacy between men and women is larger than the gap of the world aggregate, 6.7. The adult literacy rates for both women and men in Sub-Saharan Africa are lower than the global rates. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

---

**In Sub-Saharan Africa, the labor force participation rate in females is 60.9% and in males is 72.7%**

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with the labor force participation in the world, the gap between men and women is lower in Sub-Saharan Africa.

---

**Vulnerable employment for females has improved in Sub-Saharan Africa since 1991**

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 81.3% and among men is 68.1% in Sub-Saharan Africa for 2021.
