

## Youth 15-24

Girls are still more vulnerable than boys during adolescence, particularly regarding high levels of child marriage, adolescent fertility, dropping out of school, and not entering the formal workforce. Girls face more restrictions to their mobility and autonomy as they mature, but when given the opportunities, girls often outperform boys.

### Youth labor force participation rate by sex and income group (modeled ILO estimate)

% of youth ages 15 - 24

● Female ● Male
