473 women die per 100,000 live births due to pregnancy-related causes in the Democratic Republic of Congo

The maternal mortality ratio in the Democratic Republic of Congo has improved from 760 in 2000 to 473 in 2017. Maternal mortality in the Democratic Republic of Congo is lower than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

Maternal mortality ratio (deaths per 100,000 live births)

121 of every 1,000 girls ages 15-19 gave birth in the Democratic Republic of Congo in 2019

In the Democratic Republic of Congo, the rate of adolescent fertility has decreased since 2010. The rate in 2019 was higher than the average rate in its income group.

Adolescent fertility rate (births per 1,000 women ages 15-19)

36.1% of girls and 64.7% of boys complete lower secondary school in the Democratic Republic of Congo as of 2014 data

The gap in lower secondary completion rate between boys and girls, 28.6, is larger than the gap of the Sub-Saharan Africa aggregate, 4.7. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

Adult literacy in the Democratic Republic of Congo is lower among women than among men (2016)

The gap in adult literacy between men and women, 22, is larger than the gap of the Sub-Saharan Africa aggregate, 13.1. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Adult literacy rate, by sex (% of people ages 15 and above)
In the Democratic Republic of Congo, the labor force participation rate among females is 61% and among males is 66.2% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with labor force participation in the low-income group, the gap between men and women is lower in the Democratic Republic of Congo.

Labor force participation rate, by sex (% of population ages 15+) (modeled ILO estimate)

Vulnerable employment for females has improved in the Democratic Republic of Congo since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 88.3% and among men is 66.9% in the Democratic Republic of Congo for 2019. The rate of vulnerable employment is similar for men but higher for women in the Democratic Republic of Congo compared to the average rate in Sub-Saharan Africa.

Vulnerable employment, by sex (% of total employment) (modeled ILO estimate)

Data is not available for the Democratic Republic of Congo for proportion of time spent on unpaid domestic and care work by sex (% of 24 hour day).
In 2017, 24.2% of women and 27.4% of men in the Democratic Republic of Congo had an account.

The female rate in the Democratic Republic of Congo is lower than both Sub-Saharan Africa and the low-income group. Account ownership denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money service in the past 12 months.

46.8% of men and 37.3% of women owned a dwelling either alone or jointly in 2014.

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women's empowerment, nutritional and health outcomes, and children's schooling.

33.5% of women participated in making major decisions in the household in 2014.

Women participating in making major decisions is the percentage of currently married women ages 15-49 who say that they alone or jointly have the final say in (i) making major household purchases, (ii) decisions about own healthcare, and (iii) visits to family, relatives, friends.
In the Democratic Republic of Congo, the share of women who have experienced intimate partner violence is greater than the world average, 27%.

Intimate partner violence is by far the most prevalent form of violence against women globally and is defined as the percentage of ever-married women (ages 15-49) who have ever experienced physical or sexual violence committed by their husband or partner, whereas those who have ever experienced any form of sexual violence is the percentage of women (ages 15-49) who ever experienced sexual violence irrespective of marital status and perpetrator.

Percentage of women ages 15-49 who have ever experienced:
