4 women die per 100,000 live births due to pregnancy-related causes in Denmark

The maternal mortality ratio in Denmark has remained stagnant over the last 20 years roughly around 4. Maternal mortality in Denmark is nearly the same as its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

Data is not available for Denmark for Adult literacy rate, by sex (% of people ages 15 and above)

4 of every 1,000 girls ages 15-19 gave birth in Denmark in 2019

In Denmark, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2019 was lower than the average rate in its income group.

102.3% of girls and 104.9% of boys complete lower secondary school in Denmark as of 2019 data

Girls and boys in Denmark have a very high completion rate of lower secondary school. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.
In Denmark, the labor force participation rate among females is 57.9% and among males is 66.7% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with labor force participation in the high-income group, the gap between men and women is lower in Denmark.

Vulnerable employment for females has improved in Denmark since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 3.7% and among men is 6.1% in Denmark for 2019. The rate of vulnerable employment is lower for men and women in Denmark compared to the average rate in Europe & Central Asia.

Data is not available for Denmark for Proportion of time spent on unpaid domestic and care work by sex (% of 24 hour day).
In 2017, 100% of women and 99.8% of men in Denmark had an account.

The female rate in Denmark is higher than both Europe & Central Asia and the high-income group. Account ownership denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money service in the past 12 months.

Data is not available for Denmark for house ownership status, by sex (% of population age 15-49).

Data is not available for Denmark for percentage of women ages 15-49 participating in decisions about: 
Data is not available for Denmark for Percentage of women ages 15-49 who have ever experienced:

### Seats held by women in national parliaments, female (%)

![Graph showing seats held by women in national parliaments, female (%)]

**39.7% of seats in national parliament were held by women in 2020 in Denmark**

Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women. The proportion of seats held by women in Denmark has remained roughly the same as 2010. The current rate is higher than the average rate in high-income countries.

**Women represented 26.6% of those employed in senior and middle management in 2019**

The female share of employment in senior and middle management for Denmark falls in the second quintile of all countries for which there are data. Data compiled from the most recent data point available between 2010 and 2020.
