In French Polynesia, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2019 was higher than the average rate in its income group.

38 of every 1,000 girls ages 15-19 gave birth in French Polynesia in 2019.

Data is not available for French Polynesia for Maternal mortality ratio (deaths per 100,000 live births).

Data is not available for French Polynesia for Lower secondary completion rate, by sex (% of relevant age group).

Data is not available for French Polynesia for Adult literacy rate, by sex (% of people ages 15 and above).
In French Polynesia, the labor force participation rate among females is 47.5% and among males is 60.8% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has remained roughly the same. Compared with labor force participation in the high-income group, the gap between men and women is similar in French Polynesia.

Vulnerable employment for females has improved in French Polynesia since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 8.1% and among men is 14.4% in French Polynesia for 2019. The rate of vulnerable employment is lower for men and women in French Polynesia compared to the average rate in East Asia & Pacific.

Data is not available for French Polynesia for proportion of time spent on unpaid domestic and care work by sex (% of 24 hour day).
Data is not available for French Polynesia for Share of business owners, by sex (% of total business owners)
