30 of every 1,000 girls ages 15-19 gave birth in Guam in 2019.

In Guam, the rate of adolescent fertility has decreased since 2010. The rate in 2019 was higher than the average rate in its income group.
In Guam, the labor force participation rate among females is 52.4% and among males is 75.7% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with labor force participation in the high-income group, the gap between men and women is higher in Guam.

Vulnerable employment among women has remained nearly the same since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 9.2% and among men is 9.2% in Guam for 2019. The rate of vulnerable employment is lower for men and women in Guam compared to the average rate in East Asia & Pacific.
