In Kenya, the labor force participation rate among females is 72% and among males is 76.5% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has increased. Compared with labor force participation in the lower-middle income group, the gap between men and women is lower in Kenya.

Vulnerable employment for females has improved in Kenya since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 57.1% and among men is 41.4% in Kenya for 2019. The rate of vulnerable employment is lower for men and women in Kenya compared to the average rate in Sub-Saharan Africa.

Data is not available for Kenya for proportion of time spent on unpaid domestic and care work by sex (% of 24 hour day).
In 2017, 77.7% of women and 85.8% of men in Kenya had an account.

The female rate in Kenya is higher than both Sub-Saharan Africa and the lower-middle income group. Account ownership denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money service in the past 12 months.

51.4% of men and 42.3% of women owned a dwelling either alone or jointly in 2014.

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women’s empowerment, nutritional and health outcomes, and children’s schooling.

55.8% of women participated in making major decisions in the household in 2014.

Women participating in making major decisions is the percentage of currently married women ages 15-49 who say that they alone or jointly have the final say in (i) making major household purchases, (ii) decisions about own healthcare, and (iii) visits to family, relatives, friends.
In Kenya, the share of women who have experienced intimate partner violence is greater than the world average, 27%.

Intimate partner violence is by far the most prevalent form of violence against women globally and is defined as the percentage of ever-married women (ages 15-49) who have ever experienced physical or sexual violence committed by their husband or partner, whereas those who have ever experienced any form of sexual violence is the percentage of women (ages 15-49) who ever experienced sexual violence irrespective of marital status and perpetrator.

Percentage of women ages 15-49 who have ever experienced:

- Any form of sexual violence: 14.1%
- Intimate partner violence: 39.4%

21.8% of seats in national parliament were held by women in 2020 in Kenya.

Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women. The proportion of seats held by women in Kenya has increased since 2010. The current rate is similar to the average rate in lower-middle-income countries.

More men than women used the internet to pay bills or to buy something online in 2017.

The gap in internet usage between men and women in Kenya, 13.9, is larger than the gap of the Sub-Saharan Africa aggregate, 4.5. Internet usage denotes the percentage of respondents who report using the internet to pay bills or buy something online in the past 12 months.
