29 women die per 100,000 live births due to pregnancy-related causes in Lebanon

The maternal mortality ratio in Lebanon has remained stagnant over the last 20 years roughly around 29. Maternal mortality in Lebanon is lower than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

14 of every 1,000 girls ages 15-19 gave birth in Lebanon in 2019

In Lebanon, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2019 was lower than the average rate in its income group.

Data is not available for Lebanon for Lower secondary completion rate, by sex (% of relevant age group)

Adult literacy in Lebanon is lower among women than among men (2018)

In Lebanon, both women and men have very high literacy rates. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Data is not available for Lebanon for Lower secondary completion rate, by sex (% of relevant age group)
In Lebanon, the labor force participation rate among females is 23.1% and among males is 72.2% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has increased. Compared with labor force participation in the upper-middle income group, the gap between men and women is higher in Lebanon.

Vulnerable employment among women has remained nearly the same since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 13.8% and among men is 35.7% in Lebanon for 2019. The rate of vulnerable employment is higher for men but lower for women in Lebanon compared to the average rate in Middle East & North Africa.

Data is not available for Lebanon for proportion of time spent on unpaid domestic and care work by sex (% of 24 hour day).
In 2017, 32.9% of women and 56.7% of men in Lebanon had an account.

The gap in account ownership between men and women in Lebanon, 23.8, is larger than the gap of the Middle East & North Africa aggregate, 18.8. Account ownership denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money service in the past 12 months.

6.7% of seats in national parliament were held by women in 2020 in Lebanon

Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women. The proportion of seats held by women in Lebanon has remained roughly the same as 2010. The current rate is lower than the average rate in upper-middle income countries.

In 2017 women and men used the internet to pay bills or to buy something online at approximately the same rate.

The female rate in Lebanon is higher than Middle East & North Africa but lower than the upper-middle income group. Internet usage denotes the percentage of respondents who report using the internet to pay bills or buy something online in the past 12 months.

Women represented 28.9% of those employed in senior and middle management in 2019

The female share of employment in senior and middle management for Lebanon falls in the third quintile of all countries for which there are data. Data compiled from the most recent data point available between 2010 and 2020.
