19 women die per 100,000 live births due to pregnancy-related causes in Moldova

The maternal mortality ratio in Moldova has improved from 44 in 2000 to 19 in 2017. Maternal mortality in Moldova is nearly the same as its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

22 of every 1,000 girls ages 15–19 gave birth in Moldova in 2019

In Moldova, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2019 was lower than the average rate in its income group.

104.8% of girls and 108.4% of boys complete lower secondary school in Moldova as of 2020 data

Girls and boys in Moldova have a very high completion rate of lower secondary school. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Adult literacy in Moldova is nearly the same among women and men (2014)

In Moldova, both women and men have very high literacy rates. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.
In Moldova, the labor force participation rate among females is 38.2% and among males is 45.2% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with labor force participation in the upper-middle income group, the gap between men and women is lower in Moldova.

Vulnerable employment for females has worsened in Moldova since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 26% and among men is 35.5% in Moldova for 2019. The rate of vulnerable employment is higher for men and women in Moldova compared to the average rate in Europe & Central Asia.
In Moldova, women spend 1.8 times as much time on unpaid domestic and care work than men.

The data, expressed as a proportion of time in a day, measure the average time an individual spends on household provision of services for own consumption. In 2012, women in Moldova spent 20.1% of their day and men spent 11.3% of their day on unpaid work. Data compiled from the most recent data point between 2010 and 2019.

Data is not available for Moldova for Share of business owners, by sex (% of total business owners).

In 2017, 44.6% of women and 42.9% of men in Moldova had an account.

The female rate in Moldova is lower than both Europe & Central Asia and the upper-middle income group. Account ownership denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money service in the past 12 months.

Data is not available for Moldova for House ownership status, by sex (% of population age 15-49).
