6 women die per 100,000 live births due to pregnancy-related causes in Montenegro

The maternal mortality ratio in Montenegro has remained stagnant over the last 20 years roughly around 6. Maternal mortality in Montenegro is nearly the same as its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

Maternal mortality ratio (deaths per 100,000 live births)

8 of every 1,000 girls ages 15-19 gave birth in Montenegro in 2019

In Montenegro, the rate of adolescent fertility has decreased since 2010. The rate in 2019 was lower than the average rate in its income group.

Adolescent fertility rate (births per 1,000 women ages 15-19)

89.2% of girls and 90.1% of boys complete lower secondary school in Montenegro as of 2020 data

The female rate in Montenegro is lower than Europe & Central Asia but nearly the same as the upper-middle income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

Adult literacy in Montenegro is nearly the same among women and men (2018)

In Montenegro, both women and men have very high literacy rates. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Adult literacy rate, by sex (% of people ages 15 and above)
In Montenegro, the labor force participation rate among females is 47.8% and among males is 63.6% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has increased. Compared with labor force participation in the upper-middle income group, the gap between men and women is lower in Montenegro.

Vulnerable employment among women has remained nearly the same since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 8.6% and among men is 17% in Montenegro for 2019. The rate of vulnerable employment is similar for men but lower for women in Montenegro compared to the average rate in Europe & Central Asia.

Data is not available for Montenegro for proportion of time spent on unpaid domestic and care work by sex (% of 24 hour day).
In 2017, 67.6% of women and 69.2% of men in Montenegro had an account.
The female rate in Montenegro is lower than Europe & Central Asia but nearly the same as the upper-middle income group.
Account ownership denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money service in the past 12 months.

Data is not available for Montenegro for Share of business owners, by sex (% of total business owners).

Data is not available for Montenegro for House ownership status, by sex (% of population age 15-49).

Data is not available for Montenegro for Percentage of women ages 15-49 participating in decisions about:

Data is not available for Montenegro for Percentage of women ages 15-49 who have ever experienced:
22.2% of seats in national parliament were held by women in 2020 in Montenegro

Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women. The proportion of seats held by women in Montenegro has increased since 2010. The current rate is lower than the average rate in upper-middle income countries.
