250 women die per 100,000 live births due to pregnancy-related causes in Myanmar

The maternal mortality ratio in Myanmar has improved from 340 in 2000 to 250 in 2017. Maternal mortality in Myanmar is higher than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

28 of every 1,000 girls ages 15-19 gave birth in Myanmar in 2019

In Myanmar, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2019 was lower than the average rate in its income group.

67.9% of girls and 61.7% of boys complete lower secondary school in Myanmar as of 2018 data

The female rate in Myanmar is lower than both East Asia & Pacific and the lower-middle income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Adult literacy in Myanmar is lower among women than among men (2019)

The adult female literacy rate in Myanmar is lower than in East Asia & Pacific. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.
In Myanmar, the labor force participation rate among females is 46.2% and among males is 76.1% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has decreased. Compared with labor force participation in the lower-middle income group, the gap between men and women is lower in Myanmar.

Vulnerable employment for females has improved in Myanmar since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 63.7% and among men is 61.5% in Myanmar for 2019. The rate of vulnerable employment is higher for men and women in Myanmar compared to the average rate in East Asia & Pacific.

Data is not available for Myanmar for Proportion of time spent on unpaid domestic and care work, by sex (% of 24 hour day).
More men than women owned a business in 2018

The share of female business owners for Myanmar falls in the fourth quintile of all countries for which there are data. Share of business is calculated as the proportion of female or male newly registered limited liability company owners out of the total number of newly registered limited liability company owners in the economy in the calendar year. Data compiled from the most recent data point between 2016 and 2018.
