195 women die per 100,000 live births due to pregnancy-related causes in Namibia

The maternal mortality ratio in Namibia has improved from 348 in 2000 to 195 in 2017. Maternal mortality in Namibia is lower than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

60 of every 1,000 girls ages 15-19 gave birth in Namibia in 2019

In Namibia, the rate of adolescent fertility has decreased since 2010. The rate in 2019 was higher than the average rate in its income group.

80.5% of girls and 72.8% of boys complete lower secondary school in Namibia as of 2017 data

The female rate in Namibia is higher than Sub-Saharan Africa but lower than the upper-middle income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Adult literacy in Namibia is nearly the same among women and men (2018)

In Namibia, both women and men have very high literacy rates. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.
In Namibia, the labor force participation rate among females is 55.8% and among males is 63.4% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has increased. Compared with labor force participation in the upper-middle income group, the gap between men and women is lower in Namibia.

**Vulnerable employment for females has improved in Namibia since 1991**

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 38.6% and among men is 24.9% in Namibia for 2019. The rate of vulnerable employment is lower for men and women in Namibia compared to the average rate in Sub-Saharan Africa.

**Data is not available for Namibia for Proportion of time spent on unpaid domestic and care work, by sex (% of 24 hour day)**
In 2017, 80.7% of women and 80.6% of men in Namibia had an account. The female rate in Namibia is higher than both Sub-Saharan Africa and the upper-middle income group. Account ownership denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money-service in the past 12 months.

31.9% of men and 30.9% of women owned a dwelling either alone or jointly in 2013. For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women's empowerment, nutritional and health outcomes, and children's schooling.

74.6% of women participated in making major decisions in the household in 2013. Women participating in making major decisions is the percentage of currently married women ages 15-49 who say that they alone or jointly have the final say in (i) making major household purchases, (ii) decisions about own healthcare, and (iii) visits to family, relatives, friends.
In Namibia, the share of women who have experienced intimate partner violence is nearly the same as the world average, 27%.

Intimate partner violence is by far the most prevalent form of violence against women globally and is defined as the percentage of ever-married women (ages 15-49) who have ever experienced physical or sexual violence committed by their husband or partner, whereas those who have ever experienced any form of sexual violence is the percentage of women (ages 15-49) who ever experienced sexual violence irrespective of marital status and perpetrator.

Percentage of women ages 15-49 who have ever experienced:
