53 women die per 100,000 live births due to pregnancy-related causes in the Seychelles

The maternal mortality ratio in the Seychelles has remained stagnant over the last 20 years roughly around 53. Maternal mortality in the Seychelles is lower than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

60 of every 1,000 girls ages 15-19 gave birth in the Seychelles in 2019

In the Seychelles, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2019 was higher than the average rate in its income group.

99.1% of girls and 103.8% of boys complete lower secondary school in the Seychelles as of 2020 data

Girls and boys in the Seychelles have a very high completion rate of lower secondary school. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Adult literacy in the Seychelles is nearly the same among women and men (2018)

In the Seychelles, both women and men have very high literacy rates. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.
