68 women die per 100,000 live births due to pregnancy-related causes in St. Vincent and the Grenadines

The maternal mortality ratio in St. Vincent and the Grenadines has improved from 80 in 2000 to 68 in 2017. Maternal mortality in St. Vincent and the Grenadines is nearly the same as its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

47 of every 1,000 girls ages 15-19 gave birth in St. Vincent and the Grenadines in 2019

In St. Vincent and the Grenadines, the rate of adolescent fertility has decreased since 2010. The rate in 2019 was higher than the average rate in its income group.

96.4% of girls and 88% of boys complete lower secondary school in St. Vincent and the Grenadines as of 2018 data

The female rate in St. Vincent and the Grenadines is higher than both Latin America & Caribbean and the upper-middle income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Data is not available for St. Vincent and the Grenadines for Adult literacy rate, by sex (% of people ages 15 and above)
In St. Vincent and the Grenadines, the labor force participation rate among females is 57% and among males is 77.4% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has increased. Compared with labor force participation in the upper-middle income group, the gap between men and women is similar in St. Vincent and the Grenadines.

Vulnerable employment among women has remained nearly the same since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 18% and among men is 23.4% in St. Vincent and the Grenadines for 2019. The rate of vulnerable employment is lower for men and women in St. Vincent and the Grenadines compared to the average rate in Latin America & Caribbean.

Data is not available for St. Vincent and the Grenadines for Proportion of time spent on unpaid domestic and care work, by sex (% of 24 hour day).
