396 women die per 100,000 live births due to pregnancy-related causes in Togo

The maternal mortality ratio in Togo has improved from 489 in 2000 to 396 in 2017. Maternal mortality in Togo is lower than its regional average. Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births.

Maternal mortality ratio (deaths per 100,000 live births)

88 of every 1,000 girls ages 15-19 gave birth in Togo in 2019

In Togo, the rate of adolescent fertility has remained roughly the same since 2010. The rate in 2019 was lower than the average rate in its income group.

Adolescent fertility rate (births per 1,000 women ages 15-19)

46.5% of girls and 57.2% of boys complete lower secondary school in Togo as of 2020 data

The gap in lower secondary completion rate between boys and girls, 10.7, is larger than the gap of the Sub-Saharan Africa aggregate, 4.7. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

Adult literacy in Togo is lower among women than among men (2019)

The gap in adult literacy between men and women, 24.9, is larger than the gap of the Sub-Saharan Africa aggregate, 13.1. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Adult literacy rate, by sex (% of people ages 15 and above)
In Togo, the labor force participation rate among females is 56.3% and among males is 61.4% for 2019.

The labor force participation rate is the proportion of the population ages 15 and older that is economically active. Since 1990, female labor force participation has increased. Compared with labor force participation in the low-income group, the gap between men and women is lower in Togo.

Vulnerable employment for females has improved in Togo since 1991.

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 87.5% and among men is 62.1% in Togo for 2019. The rate of vulnerable employment is lower for men but higher for women in Togo compared to the average rate in Sub-Saharan Africa.

Data is not available for Togo for proportion of time spent on unpaid domestic and care work by sex (% of 24 hour day).
In 2017, 37.6% of women and 53% of men in Togo had an account.

The gap in account ownership between men and women in Togo, 15.5, is larger than the gap of the Sub-Saharan Africa aggregate, 11.5. Account ownership denotes the percentage of respondents who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or report personally using a mobile money service in the past 12 months.

29.7% of men and 10.5% of women owned a dwelling either alone or jointly in 2014.

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women’s empowerment, nutritional and health outcomes, and children’s schooling.

29.4% of women participated in making major decisions in the household in 2014.

Women participating in making major decisions is the percentage of currently married women ages 15-49 who say that they alone or jointly have the final say in (i) making major household purchases, (ii) decisions about own healthcare, and (iii) visits to family, relatives, friends.
In Togo, the share of women who have experienced intimate partner violence is less than the world average, 27%.

Intimate partner violence is by far the most prevalent form of violence against women globally and is defined as the percentage of ever-married women (ages 15-49) who have ever experienced physical or sexual violence committed by their husband or partner, whereas those who have ever experienced any form of sexual violence is the percentage of women (ages 15-49) who have ever experienced sexual violence irrespective of marital status and perpetrator.

Percentage of women ages 15-49 who have ever experienced:

- Any form of sexual violence
- Intimate partner violence

10.5% 22.1%

18.7% of seats in national parliament were held by women in 2020 in Togo.

Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women. The proportion of seats held by women in Togo has increased since 2010. The current rate is lower than the average rate in low-income countries.

Seats held by women in national parliaments, female (%)

Women represented 29.5% of those employed in senior and middle management in 2017.

The female share of employment in senior and middle management for Togo falls in the third quintile of all countries for which there are data. Data compiled from the most recent data point available between 2010 and 2020.

Employment in senior and middle management, female (%)

More men than women used the internet to pay bills or to buy something online in 2017.

The national rate for women's internet usage is similar to the average rate within Sub-Saharan Africa and among low-income countries. Internet usage denotes the percentage of respondents who report using the internet to pay bills or buy something online in the past 12 months.

Used the internet to pay bills or to buy something online in the past year, by sex (% age 15+)
